
How to mix skins

Posted by andygrunt - 2006/12/12 06:25

I notice the comment on the home page saying 'you can even mix different skins together.'

I'd like to use the excellent digital clock from the 'Rewind' skin and use it with a more legible calendar (such as the default Shadow4 skin).

Are there simple instructions on how to mix skins somewhere?

All you have to do is to select the desired component from the option and they will be displayed. You are not restricted to use components of only 1 skin.

Hey that did it! :)

Now if I can persuade the skin author to seperate his digiclock it'll be perfect.

Thanks.
