## Week view request

Posted by kati42 - 2010/09/08 07:24

---

I often only care about a particular range of times on my week view. It'd be really helpful if there were a setting for "start time" and "end time", and the week view would render that range of times automatically within the height of the view. It'd also be great to have a "no scrollbar" setting so that the view ONLY showed those times. (I keep accidentally moving the scrollbar).

Thanks for a great program! I bought the Pro version a while ago and still love it.

Yes, this would be a very useful feature :)

+1

Yes, it could be useful. I can add this to my backlog.

Has this been implemented? I love the week view window, but I don't use the first six hours of the day...

I hope it comes out soon :laugh:  
Will there be an horizontal version too?
