
installation in ubuntu

Posted by mokmoki - 2006/12/12 11:57

i can't seem to install rainlendar on ubuntu?

i followed the instructions and here's what i get:

```
tar jxvf Rainlendar-Lite-2.0.1.tar.bz2
rainlendar2/
rainlendar2/locale/
rainlendar2/plugins/
tar: rainlendar2/locale: Cannot utime: Operation not permitted

Do you have proper permissions in the folder? Are you running the command in a Linux partition and not e.g. Windows FAT partition? Can you uncompress it with File Roller (the Gnome archive manager)?

thanks for the help! turns out i was untar-ing it from a FAT32 partition...

so in linux, you cant un-tar on FAT partitions?
