## Week schedule

Posted by Maerius - 2010/09/15 12:30

---

Hi,

I have a fixed weekly schedule at my univercity. I've come up with an idea to have it inside the rainlendar. However - Is it possible to have the Calendar, Todo and Event windows up, WITH a weekly chart ?

tl;dr Can I open a fixed weekly (not a specific week in the year, just 7 days)chart and put my lectures onto it ?

Monday Tuesday

blabla asdasd  
asd asdasd  
asd asdasd  
asd asdasd etc.

You can create weekly recurring events so that they are shown in every week. That way you can define e.g. holiday breaks to the calendar too.

Thanks !

I've found the week view and put in the recurring events.  
Also some of my classes take place once every 2 weeks, so I've set them to 2 week recurrence.

Thank you so much, you've been very helpful, love the Rainlendar !

Peace
