
How change language in Rainlendar?

Posted by Rain - 2010/09/18 04:30

Hi

I don't now how change language. FAQ read 20 times, but its don;t help for me. I download language file, click on them twice, but windows can,t open this file. What I can do?

It seems that your Rainlendar doesn't recognize the language file. You should remove and reinstall it. :)

Hi

I'm under Kubuntu 10.04

An I'm trying to turn Rainlendar to french.

I've download the French.r2lang file but when I open the file with rainlendar 2 nothing happen. I've tried to install again rainlendar but it's the same. The system tells me that the French.r2lang file is an archive, I can unark-it, and inside is a folder fr_FR that contain 2 files rainlendar2.mo and rainlendar2.po; Where can i uncompact the file?

Go back to the language page and look at the bottom the "Language Pack for Shadow4". Download the file Shadow4-Languages.r2skin-addon.
