
Change default reminder time

Posted by Dremora - 2010/10/05 15:27

Hi, here is my suggestion. I'd really like a way to change the default time a reminder is set at. When I add a new event, it will always be set to "15 minutes before". As I usually want a reminder one day in advance, I have to change this manually every time, which is a bit of a nuisance. Maybe you can allow us to customize our own default time for this, or have the program remember what time we last chose?

Thanks for a great and useful calendar tool, and best of all, offering it for free. :)

Change the time reminder as you want. Then, look for the template menu. Save your event with a name ("default" for example). Below is the option "Default event template". Select the one you created. Done!

That works! I had no idea. You can ignore my suggestion. Thanks for the help!
