## What CMS system?

Posted by Yogurt - 2006/10/31 01:58

---

What cms system are you using for this website rainy? Its a very fast system, could you tell me?

Really, well ive just got to say good job, ive been looking for a template for my website, templates for joomla seem highly complicated, yours looked like something that could be modified into something i was looking for, joomla doesn't have very many free templates.

If you don't know them already, you could try SMF forums together with Tiny Portal...
