## hide/show option in context menu

Posted by mhf - 2006/12/14 10:17

---

I like to keep my desktop clean (Emergedesktop - excellent) so I have tried putting normal transparency to 0% and mouseover to 100%, however this means that the reminders, tooltips etc. don't show up either !  
So I was wondering about the possibility of a show/hide option in the right-click context menu to show or hide Rainlendar as wished...

The alarm and tooltip windows don't use the transparency setting so they are always opaque. Anyway, wouldn't it be easier to hide/show the windows from a hotkey than from menu item?

Yes, you're right of course Rainy, sorry to waste your time, I hardly ever use hotkeys so I didn't think of looking there !  
Thanks.
