## Manager: copy (table)

Posted by okh - 2006/12/15 05:55

---

I am amazed at how fast everything is. I've got 600+ events and todos - many, if not most, recurring - in some 6+ calendars. Excellent piece of software, both under Linux and XP.

1) If it were possible to copy (multiple entries) from the Manager window in tabular format (into spreadsheet) it would open very interesting possibilities in terms of time-reporting etc. The Manager windows sorts and exports so fast, that producing accounting data would be easy...

2) Visually it would be great if there could be a manager window displaying normal "month" format. A Mon-Fri grid where entries are displayed under each day.

ok

1) I've been planning to implement a CSV or TSV exporter as an example how to make plugins for Rainlendar. However this has a low priority at the moment (gotta fix the bugs first).

2) Interesting idea. I have thought about having different views (month, week, day) as a normal windows but why not in the manager dialog too.
