
Choose a snooze time in the alarm window

Posted by Axier - 2010/10/26 03:07

I think it would be a good improvement to add a comboBox or anything similar in the pop up alarm window to choose a snooze time for the next reminders.

I know that it is configurable in "Options>>Advanced" window but it is not handy in my opinion.

You can choose the snooze time if you right click over the item in the alarm window or click and hold down the snooze button.
