## Repeating event suggestions

Posted by andygrunt - 2006/12/15 11:14

---

I have 2 suggestions to improve repeating events...

1 - Have the option to show number of years passed on any entry not just those in the 'Birthday' and 'Anniversary' categories. Maybe also have option to display number of 'units' past between occurrences i.e. number of weeks past between weekly events.

2 - Have the option to only show the next occurrence of a repeating item (e.g. a daily or weekly item) so as not to clutter up the calendar.

Thanks.

1. Format tags are planned which should make these kind of things possible.

2. That might just confuse people. A lot of people just change the settings randomly and then I have to answer to their questions why certain events are not showing in the calendar.

Fair enough - it's your app' after all. I have found that function invaluable on my last few organisers though.
