
Alarms going off after amending the entry

Posted by andygrunt - 2006/12/15 11:15

If I have an event that also contains a few notes, I sometimes open the entry after it's due to view or amend the notes but when I close it, the alarm goes off again. I can't see the advantage of this so would prefer the alarm not to go off if I close an entry after its due time.

Thanks.

I'll check if it's possible to reset the alarm only if it has been changed.
