
future start date for task..

Posted by shinau - 2006/12/15 23:29

When a start date is in the future for a task, it doesn't show on the list until the current date matches the start date. Is there any way to not do this, and show the task regardless of a future start date?

If you want to see the event always in the list do not define the start date for it.
