
disable proxy option

Posted by stephane.bertin - 2010/11/11 14:07

Hi,

I use rainlendar pro on my laptop both at home and at work (web proxy).
When I'm at home I have to clear "Proxy Server" field in options menu to be able to synchronize with my Google agenda.
It would be nice to have an option in the right click menu to disable/enable proxy, like feedreader for example (see attachment) !

Thanks !!!

Have you tried enabling the Options->Advanced->"Try direct connection if proxy fails"?

Yes but it doesn't work.

It's look like it tries direct connection only if proxy authentication fails, not if proxy is unreachable.

Try the latest beta version. If the direct connection still fails with it please attach the Rainlendar's debug log so I can see what kind of error the network connection returns.

I've tried v2.8b99 but "Direct option" still doesn't work.

See attached debug file.

Thanks. I found a bug which caused the direct connection to fail if the suppress errors was enabled for the Google calendar. I'll fix that in the next build.

Works fine with 2.8b100 !

Thanks
