
\ "Loop the alarm sound\" only n times

Posted by JSimR - 2010/11/28 05:21

Hi,

The option "Loop the alarm sound" is very useful to me but it has a problem: if I am not in home when the alarm sounds, the loop continues until rainlendar2 crashes.

I think that this option would be more useful if it had one option to stablish the loop times. If that value would be 0 it remains "forever".

Limiting the number of times the sound is played is not possible since the application doesn't get a notification when the playback is done but it should be possible to add a some kind of timeout for it. I'll check this.
