## text relative coordinates?

Posted by szerda - 2010/12/15 04:17

---

Hi

(sorry my english)

I have a window with this elements:

...  
... (y= relative coordinate)  
... (y= relative coordinate)

it is work good, but if i put text element between calendar and eventlist, everything that under text element, put up window top.

why? text element not support relative coordintes?

Thanks  
Szerda

Can you attach a (fully working) example skin which shows the problem?

The layout might get messed up because the text element doesn't have any dimensions. Try adding height for the text:
