
Tooltips in buttons don't work

Posted by JSimR - 2010/12/16 06:14

Rainlendar2-pro (with licence) v2.8.b99-1

I have defined tooltips in several buttons in my skin.xml (I attach it) but Rainlendar2 doesn't show anything when I move the mouse over the button.

My tooltip config:

http://img2.imagebanana.com/img/wy7w365t/1216Options.Rainlendar2_002.png

The normal tooltips currently work only on Windows.

I had the same problem. If I change the option in Options-Advanced-show tooltips, I never saw the tooltip. When I edit the rainlendar2.ini --> ShowTooltips=1 the tooltips are to see. Only until rainlendar overwrite this file!!

I need linux and rainlendar2.8 (b101) too.

That's caused by a problem in the German translation. I updated the file so just download and install the translation again.
