
Toggle Windows Glitch

Posted by Nighted - 2006/10/28 20:57

If you have "Hide windows if there are no items" selected and you toggle the windows (I'm doing it using the tray icon option), the empty windows return. I'm guessing this was not intended and therefore can be classified as a bug.

Thanks for the lite version.

Yes, it's a bug. I'll fix that.
