
Sync with samsung d900

Posted by basuitdelft - 2006/12/18 08:43

I have a good mobile telephone (samsung d900) and want to sync this with rainlandar. Is this already possible or will it be possible in the future?

At the moment MyPhoneExplorer and FinchSync are the only options to get the Rainlendar's events synced with a mobile phone as far as I'm aware of.
