
Date in Systray is not updated

Posted by raena - 2010/12/21 06:55

The date icon in the Systray is not updated.
My PC is running all the time and shows an old day.

Windows XP SP3,
Rainlendar Lite.

Thx.

Hello,

I have the same problem.
Especially for the case that the computer is hibernated over night.
Rainlendar should check from time to time whether he is up to date with the system time and refresh the tray icon. The main calendar on the desktop is refreshed properly.

At least the "refresh" option in the menu should update the try icon as well.

Currently only restarting the program fixes this issue.

Best regards,
Martin

P.S. I'm using Rainlendar Lite (Version 2.8.1 (b103) 64 bit
Build on Feb 4 2011) on Win 7 Professional x64.
Plugins
iCalendar Format v1.7 (b103)
Rainlendar Ini Format v1.3 (b103)

Rainlendar should check from time to time whether he is up to date with the system time and refresh the tray icon.
This is already done once per second.

At least the "refresh" option in the menu should update the try icon as well.
Refresh will remove the tray icon and recreates it again.

Anyway this is a known problem. In most systems the tray icon gets updated correctly but there seems to be some Windows installations where this doesn't happen. Unfortunately I have not found any such system where the problem exists so I have not been able to debug the problem.
