hey everybody,

i just recognized, that i haven't updated my rainlander since some time - ok.. my version: 0.211 :P... so i downloaded the new 2.0.1 and now i asking me how i could get my dates in the new one? is there a way?

update: i'm sorry for my stupid question... of course i can ^^ ...

Normally Rainlendar would automatically find your old settings and import them. Maybe due to the older age of the data files this has not happened. I would try instead to install .221 and then reupgrade to 2.01
