## Keep Track / History ?

Posted by Pain - 2011/01/04 17:34

---

I am new to rainlendar, it looks wonderful. I am wondering if it is able to keep history of past appointments?

I am looking for something like that both as reminder and history to keep track for some appointments. Been using pen and paper until now.

If you don't manually delete the past events they will remain forever in the calendar. The manager dialog has a search option which can be used to locate the events if you don't remember their exact date.

Just tried that.

Thanks for the info. :)
