
Hide time interval in day/week view

Posted by moi.padilla - 2011/01/07 14:08

Since v2.7 (I think) I gladly "discover" this new windows in Rainlendar, dayview and weekview, but sadly there is no way to hide the hours in witch normally I didn't even think to program and event or remainder: when I'm sleeping!

So, I think would be a great addition, being able to hide a time interval (let's say, from 12-6am).

SALUDOS/REGARDS. B)

This is a planned feature.
