## To Do List Due Date Format

Posted by NewLogic87 - 2011/01/14 07:20

---

I'm trying to format the due dates on the to do list. Right now they are like but I want it like . Is there a way to remove the "Due " and/or substitute the 13 with 13th? I didn't find it in the skin or rainlendar2.ini files.

Thanks [http://www.rainlendar.net/cms/images/fbfiles/images/to\\_do\\_due\\_dates.jpg](http://www.rainlendar.net/cms/images/fbfiles/images/to_do_due_dates.jpg)

The only way to get rid of the "due" text is to create a new language and "translate" the text away. The date format doesn't support ordinal numbers so you can't have the postfix after the number.

Ah shoot, I thought there might be a substitute command similar to `Substitute="1":"1st"` like in Rainmeter. Oh well, no biggie.

Creating a custom language was a breeze with Poedit. Thanks for pointing me in the right direction :)

EDIT: Just change the format long time on windows.

Regards.
