ChromophorePlus skin

Posted by Lekiam - 2011/01/15 04:04
_____

Hello,

Just wanted to let you know that I upload a skin called ChromophorePlus to the www.customize.org website.

ChromophorePlus is my own addoptation of the Chromophore skin.

Compared to original Chromophore skin (version 1.1):
- Added grey and black colours
- Added countdown window:
  It shows the number days before an event starts.
  An event is added to the countdown window by selecting the Countdown category.
- Added show adjecent days option
- Made weeknumber option global
- Corrected some template and skin errors

_____

Updated the skin to version 1.1 because some of the scripts got broken by the Lua 5.2 update in Rainlendar v2.10.
