.ics Monitoring by date modified not working

Posted by schoolboyeric - 2011/01/19 09:09

_____

Have to use the below and the window keeps popping up in front of my current window which is annoying.
http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=3&id=11916

Or is this option only available on pro?

_____

The script causes a full refresh which brings the windows in front. Have you tried Rainlendar version 2.8? It should check the modified date also for the monitored file.
