### 3 months view

Posted by basanel - 2006/12/20 02:22

---

I'd appreciate if anybody could help me out with my question. How I can manage to see three months view: a previous, current and the next?

Thanks a lot in advance.

Have you tried to follow the instructions in the FAQ?

[http://www.rainlendar.net/cms/index.php?option=com\\_easyfaq&Itemid=26#faq7](http://www.rainlendar.net/cms/index.php?option=com_easyfaq&Itemid=26#faq7)

I did as in it was indicated in FAQ. Later, I noticed that all three months show the same year of 2006. Is that something I did wrong or it is the program bug? Sorry, could not upload the image.

Thank you very much.

Do you mean that the calendar that shows January shows the 2006 dates instead of 2007? Did you set the visible month to "+1" and not e.g. "1"?

Thanks again. It fixed. I did not put the "+".  
Appreciated.
