## Week Number delta

Posted by Argh - 2006/12/20 11:05

---

Hey, I'm having a little difficulty setting up the WeekNumberDelta just the way i want it.

I'd like to change it so that the week numbers reflect the current week of my university course (they love to refer to week numbers for events and such).

I thought i had set it up OK until i had a look at January and saw that the week numbers repeated themselves then started decreasing. I tried fiddling with the delta setting and it seems all it does is adds or subtracts the number from ALL displayed week numbers, which isn't ideal since the first week of January becomes 23 and the last week in December is 74. What i'm trying to do is just change where week 1 appears, is this possible?

=====

The week numbers can change to negative depending on the WeekNumberDelta which creates weird results. The problem will be fixed in the next build.
