Delete \"already deleted\" event.

Posted by BuBBy - 2011/01/24 19:35
_____

Two events on a day at different times. (A + B)

Delete from the calendar (right click)

Delete A
then Delete All (A+B)

Then go to confirmation dialogs - confirm "delete all"
Then confirm "delete A"

(A has already been deleted by the previous "delete all")

- Rainlendar Crash.

_____

Same applies for Tasks.

Create Task "A"
Right Click "Delete Task" on "A"
ignore confirmation dialog.
Right Click on "Delete Task" on "A"
Confirm on Dialog "Do you want to delete this item" - A
Confirm on second Dialog "Do you want to delete this item".
Rainlendar crashes.
