## Modifying font colour in Elegant Vertical skin

Posted by Jedfordski - 2011/01/28 08:14

---

Hi guys,

I've just discovered the joy of Rainlendar and am using it alongside my Rainmeter setup.

I've installed the Elegant Vertical - Small skin (vertical calendar) and have managed to change a few things so that it fits in with the colour scheme of my Rainmeter setup. However, I'm stuck on one thing - how do I change the font colour of the Event and To-Do lists? There's no options within the Rainlendar front end, so I've tried changing the code. I've checked the code in the Elegant - English.ini file and the current colour appears to be set as 0. I've tried changing this number and have managed to get red, but not white ... which is what I'm after.

Any suggestions?

Cheers,

Jed.

Oh!, "Elegant Vertical - Small skin" is a old-version skin.

Want set Event-List font to red, you can:

```
>> open "Elegant - English.ini" file
```

```
>> find session
```

```
>> set EventListFontColor=0000FF
```

Is that the code for red? I'm actually after the code for white ...

Is there a newer skin that also has a vertical calendar? I notice that when I load in the Elegant skin it says that newer functions might not work with it ...

Cheers,

Jed.

I'm sure that the code is for red, attached my test screen

[http://www.rainlendar.net/cms/images/fbfiles/images/2011\\_01\\_29\\_1.png](http://www.rainlendar.net/cms/images/fbfiles/images/2011_01_29_1.png)

you can see that the event is red.

Also about newer skin, in Shadow4 skin there is a "Vertical Line Calendar" can use.

I didn't realise that the code was hex ... I did a search and found that I needed FFFFF for white and hey presto, all sorted.

---

I'll take a look at Shadow 4 ... cheers for the heads up :)

Edit: Shadow 4 vertical is perfect, can't believe I missed it first time round :D
