
other calendar then default

Posted by oknir - 2011/02/14 13:55

how it can be on todo
to assign the todo to other calendar then the default

such as my google calendar ? :(

Right click -> Options -> Skins -> Advanced >>> -> select Todo/Task List on the right tree (Windows section)
Then click on Options... button, and then select included and excluded calendars.

thank you for your answer/
i did it, but it still remains the same
when i create a new todo/task i, it can choose only
the default calendar
it even does not show another calendar on the todo's calendar dialog

Are you trying to save the task to Google Calendar? That is not possible since Google doesn't provide an API for the tasks.
