## Sydney \"EST\" Time Zone

Posted by Gables - 2011/02/16 02:00

---

Why does the EST time zone not work correctly on Rainlendar? It is 8 hours out, EST should be for New South Wales in Australia. I have to enter +11 to get it to show correctly.

"EST" maps to the US version of the time zone. Try "A\_EST" instead.

Many thanks, but it is still an hour out. guess I will have to live with that. Obviously more complicated than I thought it would be.
