
Alarm gets stuck playing over and over

Posted by AndyS01 - 2011/02/20 08:29

From time to time, when the alarm pops up, it plays the alarm file repeatedly over and over. I cannot dismiss the popup and I cannot bring up the task manager. I had to press and hold the power button.

I have the alarm set up to repeat the loop, but Rainlendar doesn't leave any time between plays, so it sounds like 1 continuous alarm.

I have other alerts set to loop the alert sound and they have been working OK. I use the same .wav file for all of my alerts.

I'm running version 2.8.1 (b103) 32 bit
My OS is Vista home Premium (sp2)

You mean that you cannot interact with any of the other applications but have to power down the computer? It shouldn't be possible for a normal application to stop the operating system from working so this sounds like a driver or hardware problem. I suggest that you update at least your sound and display adapter drivers and see if that helps.
