## version numbe resulting in new version notice

Posted by imonsei - 2011/02/23 04:30

---

just a tiny bug.

the 2.8 beta number is higher than the 2.9 beta number right now.

this means that i get a new version notice when i start rainlendar, even tho I'm using the 2.9 beta and not 2.8 :cheer:

I've attached an image that shows the about screen and new version notice popup.

The build 103 is actually newer than build 102 so it's not really a bug (although a bit confusing perhaps since the version numbers don't match).

ah. yes. that's what i ment but failed to write :P

sorry about the poor wording.
