## Tooltip: problem with display (and some questions)

Posted by bimbél - 2006/12/24 04:31

---

First I'm very glad to have Rainlendar and I love it!

I'm using the Light Version 2.0.1 (b28) and have the following problem:

This is my R2 with the tooltip!

[http://xelerus.wkjournal.de/r2\\_tooltip\\_working.png](http://xelerus.wkjournal.de/r2_tooltip_working.png)

But when I hover over a Date which is more at the top I get a problem with display (my r2 is placed in the top left corner of my screen)!

[http://xelerus.wkjournal.de/r2\\_tooltip\\_broken.png](http://xelerus.wkjournal.de/r2_tooltip_broken.png)

You can see that the "GB (19)" is Partly out of the tooltip box (and then the mouse is also over some part of the text but not visible here)!

So I want to know If there is a way to change this? Can I maybe change the whole look of the tooltip?

ps. I don't know If I said it already: Rainlendar is GREAT!

pps. If I have red days for appointments and green days for birthdays and I have both on one day, how is determined in which color the day is displayed in the calendar?

ppps. Greetings from Germany :)

=====

The problem with the tooltips is a bug. I'll fix that.

The events have a priority (set in the skin) which defines the one that is shown in the calendar. If the priorities are the same the shown event is selected more or less randomly.
