
Hot key to make windows show on top

Posted by qiang - 2006/12/24 07:42

I'm new to programming so I don't know how to set the hot key to make Rainlendar appear on top when Rainlendar is originally pin to desktop.
It is something like the toggle window, just that it is not show and hide but rather appear on top and go back to desktop.
Please assist. Thanks.

That's not possible at the moment but it's on my todo list.

This is the only thing keeping me from using Rainlendar2, so I would love to see this added soon. Thanks!
