FRANCAIS

Bonjour,

j'ai installé le Pacht "French.r2lang" celui-ci ne traduit que le menu, que faut il faire pour mettre les mois, evenements, et a faire.

j'ai bien les fichier "png" en FR mais je ne sais pas ou faut il les mettre ?

cordialement,

Anglais

Hello, I installed(settled) Pacht " French.r2lang " this one translates only the menu, that needs he(it) to make to put months, evenements, and has to make.

I indeed have file " png " in FR but I do not know or needs he(it) to put them?

thank, bye

Go to the languages page, download the Shadow4.r2skin-addon and install it.

Bonjour

Merci, j'ai déjà ce fichier mais je ne sais pas ou les copier, ou dois mettre les fichiers

répertoire "images" "*.png"

répertoire "xml" fichier "languages.xml.diff"

et les fichiers "ini"

merci

anglais

Hello Thank you, I already have this file but I do not know how to or copy them, or have to put files directory "images"

*".png" directory " xml " file " languages.xml.diff " and files " ini "

thank you

Make sure that the name of the file is "Shadow4.r2skin-addon" (and not e.g. "Shadow4.zip") and just double click it. It's not possible to install it just by copying the files.

Francais

Bonsoir,

merci pour votre réponse,

j'ai téléchargé "Shadow4.zip" ou puis je trouver "Shadow4.r2skin-addon" car je ne le trouve pas ?

pouvez vous m'indiquer le lien, merci

cordialement

Anglais

Good evening, thank you for your answer, I downloaded "Shadow4.zip" or then I to find "Shadow4.r2skin-addon" because I do not find him(it)?
Can you indicate me the link, kind regards

Tounickel

It's the same file. But if you download "Shadow4.r2skin-addon" with Internet Explorer (IE), IE 'recognized' the file as a zip-file and renames it automatically to "Shadow4.zip" (thanks Bill for that).

So you have to save the file as "Shadow4.r2skin-addon" instead of "Shadow4.zip". Or rename the file "Shadow4.zip" after downloading to "Shadow4.r2skin-addon".

Then install the skin as mentioned in the Help and/or the FAQ.

Good luck!
