Todo due

Posted by msl23 - 2006/12/27 09:29

_____

Is there any way to get rid of the word 'due' in the todo-list? . Since I obviously know what the date stands for, I don't need the word 'due' repeatedly displayed 20 times on my list. Tried to search the forums and rainlendar files, but I didn't get far.

_____

You can change the string in the language file. If you're using English language you can create a new language file from the template and put it in a folder called "en_US" (or "en_GB").
