
StaticaEN_HUD_Edit.r2skin : WTF?

Posted by zak_711 - 2011/03/26 04:33

Hi. The first time I've been here I didn't know there was a huge tutorial for this "simply" app. I presume that nobody (of the power users) wants to read the rookie's silly questions; and do you think that a rookie can read the huge tutorial? Probabily, if he wants to resolve I think he will do that, like I had to do!

The only question, I think, I could do is this:

Why when I recompress (after modifying a parameter on an .xml file with notepad) files and folders to .zip, and then renaming to .r2skin the size of the .r2skin increases at least of 5-6K ?

I think that's incredible!

Thanks.

(and for the huge tutorial too!) :side:
