## Subcategories for todolist

Posted by vox - 2006/12/27 21:45

---

Hi,

it would be nice to have subcategories for the todolist. Or subitems. That means to have several projects with subitems in the category 'work'.

I think that's related to the idea of multiple lists posted in an earlier thread.

What do you think?

I'm not sure if that's possible with the iCalendar standard. And I'm not too keen on adding custom extensions to the ics-files since it'll break the compatibility with other applications.

Anyway, the support for multiple todo lists with category filters at least will be possible in the future.

I see.

While you're on it, please add a feature to choose the secondary sort .. uhm.. item. For instance sort by category first then by priority (second one is alphabetically now).

Thanks, i really like the new version so far.
