
custom reminder snooze

Posted by pelinore - 2011/04/09 21:23

I would like to suggest adding a feature that allows users to customize the snooze time for each reminder. I am using the lite version of the railendar (I am saving up to get the pro version), so I know it does not have this feature. I did not see this feature listed as an additional feature for the pro version. I really like have the reminders, but I would like some flexibility in snooze time for each alarm.

I don't know if you will define this as custom, but if you right click on the alarm window when it shows, you can select a snooze time of 1,5,10,30,60 or 120 minutes.
