## New/edit event/task doesn't focus the window.

Posted by JSimR - 2011/04/10 05:19

---

Rainlendar Pro 2.9 (b104) 64 bits.

Ubuntu Lucid 64 bits

Metacity with Compiz enabled

When I try to add/edit one event/task, the window opened lost the focus immediately after it opens. I have to click in it to can write in the window.

Where does the focus go? I checked this but it doesn't seem to be happening in my Ubuntu (not using Compiz though).
