
Rainlendar 2.9 BETA build 105

Posted by Rainy - 2011/04/17 05:47

Build 105 can be downloaded from here:

Windows (32-bit): Rainlendar-2.9.b105-32bit.zip
Windows (64-bit): Rainlendar-2.9.b105-64bit.zip
Linux TAR (32-bit): Rainlendar-2.9.b105-i386.tar.bz2
Linux DEB (32-bit): rainlendar2-pro_2.9.b105-1_i386.deb
Linux TAR (64-bit): Rainlendar-2.9.b105-amd64.tar.bz2
Linux DEB (64-bit): rainlendar2-pro_2.9.b105-1_amd64.deb
Mac OS X (Intel): Rainlendar-2.9.b105.dmg

MD5SUMS-b105

This is beta version! It has not been tested.

Changes:

- o Added advanced option "Time span in the editor" which defines how many time items are shown in the editor.
- o The calendar wizard for Google calendar can now download the calendar list from the server.
- o Changing a template didn't reset the alarms properly.
- o The all day events can be moved with the mouse in the week view.
- o Added dragging support for the month view.
- o Holding shift and ctrl keys down on startup asks to reset the Rainlendar's settings.
- o The alarm for recurring tasks was calculated from the start time instead from the due time.
- o Added new function to list the calendars: Rainlendar_GetCalendars()
- o Added effectOffset and effectBlur values for the appearance nodes in xml format skins.
- o New skin: Savannah

Oh wow, like the new skin a lot ... very clean!
REALLY love the addition of offset and blur for effects ... thanks Rainy!

BUG? :
strange time-related bug in week view and in "new event" window

solution? http://www.rainlendar.net/cms/images/fbfiles/images/rainlendar_time_bug.gif

Have you made any changes to the time format settings?

Re:Rainlendar 2.9 BETA build 105

Posted by Fluffythekitten - 2011/04/26 05:56

thx for the quick reply!

Had shadow4 week view setting "time item duration" set to 30min in previous release. Had it set to 15min in this build.

changing back to 30min:
"new event" problem disappears

changing back to 60min:
"new event" problem disappears, week view problem disappears.

Do you have any idea on how to circumvent these two peculiar behaviours?

All the Best!

I found the problem with the weekview. It will be fixed in the next build. This doesn't affect the time list in the editor dialog though and that I have not been able to reproduce.

Hi, just some remarks about the new skin "Savannah" that i'm testing since few days.

- first, pretty skin !! Soft grey is relaxing and refreshing. I like !
- one bug, i think, arrows left and right in month view don't work :
<http://www.rainlendar.net/cms/images/fbfiles/images/monthview.jpg>
- mistake or not? Colors grey and pink disappeared in this beta version, is it your choice ?
- suggestions :
 - There is no "home" button to return at the current day in this skin. This is, for me, a missing feature.
 - Same think about missing number's week. But I think that's could be hard to add this information in this "one block" skin...

So, good road for this new version and skin !

Bye
machenzy

The buttons in month view doesn't work because the action is "Global_ChangeScheduleDay(-7, #WINDOW#)" (like Week View) instead of "Global_ShowMonth(-1)"

Re:Rainlendar 2.9 BETA build 105

The buttons are fixed in the next build. I'll think about the home button but note that you can always just press the home key on your keyboard to go to the current month. The week numbers can be enabled from the settings.

Thank you for the tips.
Week numbers added, key usefull to return current date!

What about pink and grey colors ?

I did some adjustments to the colors since I thought the previous were maybe a bit too bright/colorful. New colors can of course be added (especially if someone gives the RGB codes for them :-)).

OK!

Colors are usefull with this skin without icons. So, I'm ready for more colors ;) .

Thanx
MCH
