## Help background resizing

Posted by degats - 2011/04/23 12:02

---

Hi everybody,

I'm new on this forum and I'm French so please excuse me for my awful english!

I worked a lot to modify a skin called "Lucid" but now, I don't manage to find a solution to my problem. In fact, my background image doesn't resize when I add some tasks in my todo list (It looks like that) :  
<http://img263.imageshack.us/i/sansre2p.png/>

Could someone help me?

Here is my code. I think I made many errors so don't hesitate to correct me !

Thank you all and have a good day! :)

Although i do not to see the picture, but according to your code, the error is:  
because you are using ... , so the height is fixed.

Thank you for your answer. I understand !

Do you know how I could fix this problem? I mean how can I transform the "

I just saw something interesting :

In the "Shadow" xml code for "todolist", there is also a ... and the window is resizing normaly when I add a task... I don't understand.

I'm not sure, but try "STRETCH" and "TILE" (en majuscule) instead of "stretch" and "tile" (en minuscule).

In fact, your code have not much of problem,

The only mistake, as I said earlier, is in

a) Change origin2="bottom-right" into origin2="TOP-RIGHT"

b) and change y2="0" into y2="MAX-HEIGHT", like: y2="200"

=====
