
Number of future/past days the list shows

Posted by evanade - 2011/05/01 09:06

Maybe the function "Number of future/past days the list shows" combine to the skin setting is a good idea. I mean that every Events list window could adjust number of future/past days the list shows.
THX!

That should be already doable with the per window settings but I can consider adding it to the setting dialog.
