

Rainlendar crash report trying to print date range

Posted by observer - 2011/05/13 17:59

I had a preview window open for the printing of a day range (08 may 11 to end of June 2011) and I tried to close one of the 3 opened rainlendar windows.

The printing should include some 4 calendars some of which have grown pretty large over time.

I found the error reproducible; CPU remains low for the process; rainlendar starts to enter a fuzzy state as soon as I enter the print dialog and hit "preview".

The preview window has opened correctly, but I cannot set the focus to the preview window because the print options window seems to keep the focus anyway. In the print dialog, however, all options appear disabled then.

System info:

Mac OS X 10.6.7
Rainlendar Pro 2.8.1 b103 32-bit

Subsequent Crash report:

Process: Rainlendar2-Pro
Path: /Applications/Rainlendar2-Pro.app/Contents/MacOS/Rainlendar2-Pro

Re: Rainlendar crash report trying to print date range

Posted by Rainy - 2011/05/15 05:55

This is a platform specific issue. The dialogs behave incorrectly on Mac if multiple modal dialogs are opened. I managed to get rid of the crash so the preview is now actually usable but the positioning of the dialogs still have some problems.
