## RTM Cancelled tasks not updated

Posted by ryq - 2011/05/20 09:06

---

I've noticed a small problem in Rainlendar2 when using a RTM todo list. When you mark a RTM task as cancelled in Rainlendar it works fine, but there doesn't seem to be a way to mark it as active again. Whatever changes are made, on refresh the task reverts to its cancelled status.

PS- Love Rainlendar, thank you.

I tried this but if I change the status back to "needs action" it is shown as such even after refresh. The status value is stored to a RTM note called "R2:data". Value 10032 means "needs action" and 10033 means "cancelled".

Yes - I notice that if I cancel the task and then set it back to 'Needs Action' there are two notes:

R2:data  
Status: 10032  
LastAck: 20110526T164652Z

R2:data  
Status: 10033  
LastAck: 20110526T164652Z

However a rainlendar refresh still reverts it back to cancelled.

Ah well, not a big deal really.
