
recurrent event problem

Posted by matlester - 2007/01/02 05:36

When I create a new event (for exemple on 2007 Jan 02) with a reccurency of 1 week (every 1 week the event happen, on tuesday)), the event starts on mnext monday and happen every monday. If i remove the monday event thick, rainlendar add every sunday.

It is now not possible anymore to create a reccurent event with this release (it was okay with 2.0.1)

Release used : 2.0.2

I Hope i will help.
