
Rainlendar on every Desktop. Mac Os

Posted by ryfe - 2011/06/02 12:47

Hi,

I wonder how it's possible to have Rainlendar displayed on each desktop of Leopard ?
It's actually possible to have many desktop and I really want to have rainlendar on each one, and not only on the first one.

Thanks a lot.

You can do it the same way as with any other application. Go to the Expose & Spaces in System Preferences, Add Rainlendar to the "Application Assignments" list and set it to "Every space".

Ho my God!
I didn't even know that was possible! :unsure:

Sorry

Thank you very much for your quick answer and keep up this wonderfull job.

Have a good day

Bye
