
who to install 2.02

Posted by genion1 - 2007/01/02 18:27

Hi, I use xp-pro servicepack2 newest updates und since a long time reincalendar V0.22.1
I downloaded the new version for windows 2.02 un clicked on the exe. But only a "dos"-window appears and thats it.

Can you help me???
what must I do??, there comes no installer.

Thanks a lot

I would suggest downloading it again. The program downloaded is the installer and it should not run a dos window.
